PROFESSIONAL SUMMARY

Computer Science Engineering graduate with hands-on Salesforce CRM experience across Apex, SOQL, Flow Builder, Validation Rules, Approval Processes, Data Modeling, Security, and Reports & Dashboards. Built two end-to-end Salesforce applications from data model to automation, demonstrating readiness for a Salesforce Administrator or Developer.

TECHNICAL SKILLS

- **Administration:** Profiles, Roles, Permission Sets, OWD, Sharing Rules, Security Model, Data Import Wizard
- **Automation:** Flow Builder, Approval Processes, Validation Rules, Email Alerts
- **Development:** Apex (Triggers & Classes), SOQL, Lightning Record Pages, Page Layouts, Record Types
- **Data & Analytics:** Lookup & Master-Detail Relationships, Roll-Up Summary & Formula Fields, Reports & Dashboards
- **Tools:** Salesforce CRM, VS Code, IntelliJ IDEA, Git/GitHub

PROJECTS

Human Resource Management System | Salesforce CRM – Personal Project | Sep 2026 - Present

Technologies: Salesforce CRM | Apex | SOQL | Flows | Reports & Dashboards | LWC

- Developed an end-to-end HRMS application on Salesforce to manage Consultants, Employees, Interns, Contractors, Vendors, Clients, and Projects.
- Designed a scalable Salesforce data model with custom objects, fields, and relationships, including Self-Lookup for Supervisors and relationships for Bank Details, Past Information, Clients, and Projects.
- Automated employee onboarding using Record-Triggered Flows, including automatic joining-date assignment and email notifications to the selected Supervisor.
- Developed Apex Triggers and SOQL to automatically create Past Information records for Interns and prevent deletion of Approved Employee records using addError().
- Applied Apex bulkification and optimized database operations by avoiding SOQL and DML inside loops.
- Established Validation Rules, Record Types, Reports, Dashboards, and Lightning Web Components (LWC) to enforce business rules, categorize projects, monitor HR operations, and present record information through a customized Lightning interface.

Employee Leave Management System | Salesforce CRM – Personal Project | Jul 2026 – Aug 2026

Technologies: Salesforce CRM | Security | Apex | SOQL | Flows | Approval Processes | Reports & Dashboards

- Developed a leave management application from scratch using custom objects, fields, Record Types, Page Layouts, Lightning Record Pages, Tabs, and Validation Rules.
- Implemented Salesforce security and access controls using Users, Profiles, Roles, Permission Sets, OWD, and Sharing Rules based on organizational hierarchy.
- Designed Lookup and Master-Detail Relationships connecting Employee, Leave Information, and Project records.
- Automated leave application processing, status updates, approvals, and email communication through Screen Flows and Record-Triggered Flows.
- Established Approval Processes for manager review, approval, and rejection of employee leave requests.
- Developed Apex Triggers and SOQL to enforce leave-related business rules and prevent overlapping leave requests
- Created Reports and Dashboards to track leave requests, leave utilization, approval status, and project staffing.

EDUCATION

B.E. Computer Science & Engineering 2022 - 2026

KLS Gogte Institute of Technology, Belagavi (CGPA: 8.99)

Pre-University (PCMB) 2022

S Kumar's Mahesh PU College, Bijapur (Percentage: 95.3)

Secondary Education (CBSE) 2020

Sri B M Patil Public School, Bijapur (Percentage: 79)

CERTIFICATIONS & ACHIEVEMENTS

- Salesforce Training Certificate – 3RI Technologies (2026)
- TCS iON Virtual Internship Program
- Agentblazer Champion (2025–26) and Agentblazer Innovator, Salesforce Trailhead

LEADERSHIP & COMMUNITY

- Led the U&I Committee in coordinating campus activities and events.
- Volunteered as an English educator for underprivileged children.
